Art Unit: 1722

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-9 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the relationship between the column and each of the other structural elements of the claim, and specifically the relationship between the column and the piston and piston rod, and the relationship between the column and the claw bush. Lacking such essential structural cooperative relationship, the claim recitation "corresponding to an end of the piston rod and/or to an end of the column" is indefinite.

Also, in claim 7, line 6, "the column" lacks proper antecedent basis in the claim, since the preamble lacks even a mention of the column (and clearly does not provide the structural cooperative relationship between the column and the other structural elements of the apparatus).

3. Claims 1-9 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

The prior art of record does not teach or fairly suggest an interlock for a column, including a piston with a piston rod disposed in a claw bush, an end of the column also being disposed in the claw bush so as to interlock the column with the piston rod, the claw bush and the piston being movable, the claw bush having at least two stages to apply force in a distributed

Art Unit: 1722

manner, contour of the stages corresponding to an end of the piston rod and/or to an end of the column, wherein an average radius of the first stage differs from an average radius of the second stage.

While the prior art of record discloses an interlock including a piston rod and column end both being disposed in a claw bush so as to interlock the column with the piston rod, the claw bush having at least two stages to apply force in a distributed manner, contour of the stages corresponding to an end of the piston rod and an end of the column (for example, DE 274,590), the prior art of record does not teach or fairly suggest providing the claw bush such that an average radius of the first stage differs from an average radius of the second stage as claimed.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Mackey whose telephone number is 703-308-1195. The examiner can normally be reached on M-F, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda Walker can be reached on 703-308-0457. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0661.
